

# UNIT MATERIAL SAFETY CAP FOR SEALMASTER® MATERIAL HANDLING BEARINGS

Easy-to-install mechanically fastened metal safety caps protect exposed rotating shafts, reducing safety hazards around various types of equipment. These safety caps allow users to better conform to OSHA requirements.

**FEATURES AND BENEFITS:**

- Mechanically Fastened - utilizing a supplied fastener & washer (or using a lube fitting), the end cap is mechanically fastened to the bearing assembly, so as to help meet the customer's safety requirements
- High Visibility – yellow for optimum appearance
- Long-Lasting Service – durable steel material with fully enclosed slotted attachment tang stands up to typical factory conditions
- Convenient Kits – everything needed for installation onto Sealmaster material handling bearings is provided in a handy kit

SIZE	CLOSED END CAP PART DESCRIPTION*
1 7/16"	MH-23 End Cap Assm.

### APPLICATION CONSIDERATIONS

The proper selection and application of products and components, including the related area of product safety, is the responsibility of the customer. Operating and performance requirements and potential associated issues will vary appreciably depending upon the use and application of such products and components. The scope of the technical and application information included in this publication is necessarily limited. Unusual operating environments and conditions, lubrication requirements, loading supports, and other factors can materially affect the application and operating results of the products and components and the customer should carefully review its requirements. Any technical advice or review furnished by Regal Beloit America, Inc. and/or its affiliates ("Regal") with respect to the use of products and components is given in good faith and without charge, and Regal assumes no obligation or liability for the advice given, or results obtained, all such advice and review being given and accepted at customer's risk.
